SECURITY

SAP Employee Self-Service provides state of the art security and firewall protection.

TECHNOLOGY

SAP Employee Self-Service supports multiple architectures and standards, including PC, Macintosh, UNIX, common browsers, and HTML.

The Business Case for Employee Self-Service

Every organization is under constant pressure to redesign business processes and increase efficiency. Employee self-service (ESS) has become an increasingly important part of achieving these goals. Not only can ESS automate and streamline administrative processes, but it can also increase participation in your organization's human resource programs through increased accessibility and visibility. ESS is a valuable way to provide increased levels of service to your customers, while decreasing the cost of each transaction.
